• Show (via screenshot) the size of both containers on DockerHub by clicking on Tags

    1)   hw3large
    2)   hw3small
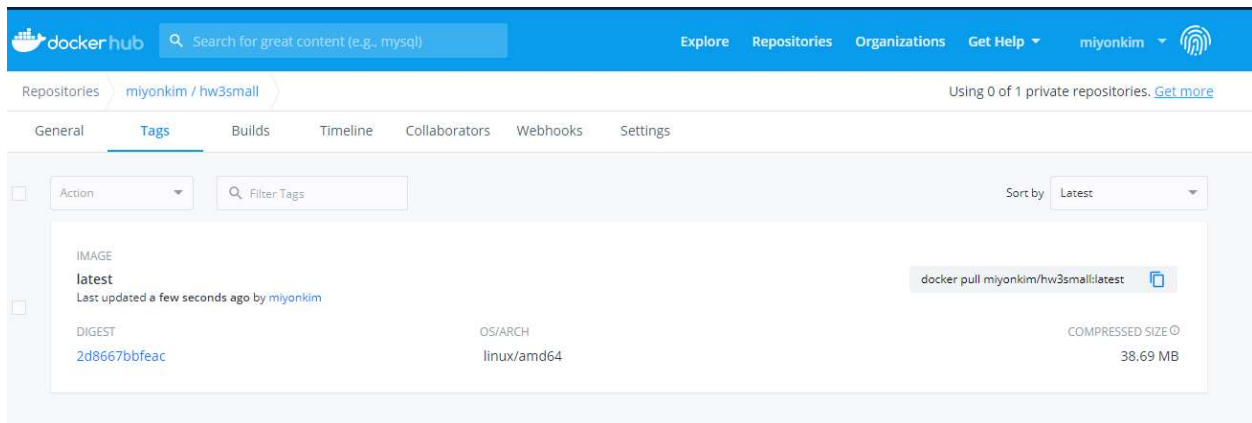

• Remove all containers and container images on your system, then use `docker run` to instantiate each container directly from one of your images on Docker Hub

    • Show the console output displaying container image layers being pulled

    • Connect to your web app locally and show it works (wget or browser)
